Response to Amendment

1. Applicant's amendment of November 19, 2004 has been entered.
2. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.
3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

4. Claims 8, 20, 21, and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Narumiya.

The patent to Narumiya discloses a gas permeable thermal insulator comprising a porous material which is heat-resistant up to 1200 degrees C and has a pore diameter of from 1 to 5 micrometers (Column 10 and Tables 1 and 2). Narumiya does not disclose a reaction tube, however, it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. Since the material disclosed by Narumiya comprises the temperature and pore diameters as recited, it would have been obvious to one of ordinary skill in the art at the time the invention was made that the material of Narumiya could be used to make a reaction tube as claimed by the instant invention. Narumiya also discloses the porous material being selected from sintered heat-resistant metal alloys (Column 6).

Allowable Subject Matter

Art Unit: 3752

5. Claim 22 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. Claims 1, 3-7, 9-11, and 13-19 allowed.
